Subject Index of Volume 246

Adhesion
relation between adhesion and friction forces across thin films, 71
Adsorption
effects of hydrogen absorption on the electrical conduction in discontinuous palladium films, 17
Aluminium
Al–Si–V and Al–Si–V–Pd films as alternatives for Al–Si–Cu interconnect: microstructure and its impact on reliability, 164
modified high resolution electron energy loss spectra applied to analyse nanometre features in AlSn sputter films, 53
Amorphous materials
DLC film deposition by Laser-Arc and study of properties, 92
Auger electron spectroscopy
Auger electron spectroscopy rotational depth profiling of Ni/Cr multilayers using O_2^+ and Ar^+ ions, 35
growth mode of Ge films on Si(100) substrate deposited by ion beam sputtering, 30

Carbides
reactive magnetron sputter deposition of CN_x films on Si(001) substrates: film growth, microstructure and mechanical properties, 103
Carbon
DLC film deposition by Laser-Arc and study of properties, 92
shock fracture replicas for thin film microstructure investigation in a transmission electron microscope, 42
Chemical vapour deposition
rapid thermal processing with microwave heating, 151
transparent conducting ZnO thin films prepared on low temperature substrates by chemical vapor deposition using $Zn(C_5H_7O_2)_2$, 65
Computer simulation
rapid thermal processing with microwave heating, 151
Contacts
evolution of the microstructure of Au(Zn) metallization during formation of an ohmic contact to p-type GaAs, 143

Deposition process
deposition of thin indium oxide film and its application to selective epitaxy for *in situ* processing, 58
Depth profiling
Auger electron spectroscopy rotational depth profiling of Ni/Cr multilayers using O_2^+ and Ar^+ ions, 35
Dielectric properties
development of a novel ellipsometer based on a four-detector photopolarimeter, 47

Electrical properties and measurements
changes of the optical and electrical properties of plasma polymer–metal composite films during thermal annealing, 77
effects of hydrogen absorption on the electrical conduction in discontinuous palladium films, 17
nanodispersed Cr_xSi_{1-x} thin films: transport properties and thermoelectric application, 24
photoelectric properties of colloidal semiconductor films, 13
preparation of EuO and EuO/Cu multilayered films and their magnetic properties, 1
structural, optical and electrical properties of polycrystalline iron pyrite layers deposited by reactive d.c. magnetron sputtering, 6
transparent conducting ZnO thin films prepared on low temperature substrates by chemical vapor deposition using $Zn(C_5H_7O_2)_2$, 65
Electrochemistry
electrochromism of iron oxide films prepared via the sol–gel route by the dip-coating technique, 131
Electromigration
Al–Si–V and Al–Si–V–Pd films as alternatives for Al–Si–Cu interconnect: microstructure and its impact on reliability, 164
Electron diffraction
reactive magnetron sputter deposition of CN_x films on Si(001) substrates: film growth, microstructure and mechanical properties, 103
Electron energy emission spectroscopy
modified high resolution electron energy loss spectra applied to analyse nanometre features in AlSn sputter films, 53
Ellipsometry
development of a novel ellipsometer based on a four-detector photopolarimeter, 47
Epitaxy
low temperature epitaxial growth by molecular beam epitaxy on hydrogen-plasma-cleaned silicon wafers, 158
magnetic and structural properties of Pt/Co and Pd/Co multilayers sputtered on single-crystal ZnO, 126
Etching
Auger electron spectroscopy rotational depth profiling of Ni/Cr multilayers using O_2^+ and Ar^+ ions, 35
Europium oxide
preparation of EuO and EuO/Cu multilayered films and their magnetic properties, 1
Evaporation
deposition of thin indium oxide film and its application to selective epitaxy for *in situ* processing, 58

Gallium arsenide
evolution of the microstructure of Au(Zn) metallization during formation of an ohmic contact to p-type GaAs, 143
Germanium
growth mode of Ge films on Si(100) substrate deposited by ion beam sputtering, 30
Growth mechanism
growth mode of Ge films on Si(100) substrate deposited by ion beam sputtering, 30

Hydrogen
effects of hydrogen absorption on the electrical conduction in discontinuous palladium films, 17
low temperature epitaxial growth by molecular beam epitaxy on hydrogen plasma-cleaned silicon wafers, 158

Indium oxide
deposition of thin indium oxide film and its application to selective epitaxy for *in situ* processing, 58
Interfaces
evolution of the microstructure of Au(Zn) metallization during formation of an ohmic contact to p-type GaAs, 143

Ion bombardment
growth mode of Ge films on Si(100) substrate deposited by ion beam sputtering, 30
Iron oxide
electrochromism of iron oxide films prepared via the sol–gel route by the dip-coating technique, 131

Magnetic properties and measurements
magnetic and structural properties of Pt/Co and Pd/Co multilayers sputtered on single-crystal ZnO, 126
preparation of EuO and EuO/Cu multilayered films and their magnetic properties, 1
Metallization
Al–Si–V and Al–Si–V–Pd films as alternatives for Al–Si–Cu interconnect: microstructure and its impact on reliability, 164
evolution of the microstructure of Au(Zn) metallization during formation of an ohmic contact to p-type GaAs, 143
Mica
relation between adhesion and friction forces across thin films, 71
Molecular beam epitaxy
low temperature epitaxial growth by molecular beam epitaxy on hydrogen-plasma-cleaned silicon wafers, 158
Monolayers
modified high resolution electron energy loss spectra applied to analyse nanometre features in AlSn sputter films, 53
Multilayers
development of Ni/Ti multilayer supermirrors for neutron optics, 110
magnetic and structural properties of Pt/Co and Pd/Co multilayers sputtered on single-crystal ZnO, 126
preparation of EuO and EuO/Cu multilayered films and their magnetic properties, 1
shock fracture replicas for thin film microstructure investigation in a transmission electron microscope, 42

Nanostructures
changes of the optical and electrical properties of plasma polymer–metal composite films during thermal annealing, 77
Nickel
development of Ni/Ti multilayer supermirrors for neutron optics, 110
Nitrides
reactive magnetron sputter deposition of CN_x films on Si(001) substrates: film growth, microstructure and mechanical properties, 103

Optical properties
changes of the optical and electrical properties of plasma polymer–metal composite films during thermal annealing, 77
development of a novel ellipsometer based on a four-detector photopolarimeter, 47
structural, optical and electrical properties of polycrystalline iron pyrite layers deposited by reactive d.c. magnetron sputtering, 6

Palladium
effects of hydrogen absorption on the electrical conduction in discontinuous palladium films, 17
Photoconductivity
photoelectric properties of colloidal semiconductor films, 13
Physical vapour deposition
DLC film deposition by Laser-Arc and study of properties, 92
Plasma processing and deposition
DLC film deposition by Laser-Arc and study of properties, 92
Platinum
shock feature replicas for thin film microstructure investigation in a transmission electron microscope, 42

Schottky barrier
preparation of Si–$TiSi_2$ Schottky diodes by rapid thermal annealing, 172
Sensors
nanodispersed Cr_xSi_{1-x} thin films: transport properties and thermoelectric application, 24
Silane
rapid thermal processing with microwave heating, 151
Silicides
nanodispersed Cr_xSi_{1-x} thin films: transport properties and thermoelectric application, 24
preparation of Si–$TiSi_2$ Schottky diodes by rapid thermal annealing, 172
Silicon
low temperature epitaxial growth by molecular beam epitaxy on hydrogen-plasma-cleaned silicon wafers, 158
rapid thermal processing with microwave heating, 151
Silver
changes of the optical and electrical properties of plasma polymer–metal composite films during thermal annealing, 77
Solar cells
aluminium content dependence of milky transparent conducting ZnO:Al films with textured surface prepared by d.c. magnetron sputtering, 86
transparent conducting ZnO thin films prepared on low temperature substrates by chemical vapor deposition using $Zn(C_5H_7O_2)_2$, 65
Sputtering
aluminium content dependence of milky transparent conducting ZnO:Al films with textured surface prepared by d.c. magnetron sputtering, 86
Auger electron spectroscopy rotational depth profiling of Ni/Cr multilayers using O_2^+ and Ar^+ ions, 35
reactive magnetron sputter deposition of CN_x films on Si(001) substrates: film growth, microstructure and mechanical properties, 103
structural, optical and electrical properties of polycrystalline iron pyrite layers deposited by reactive d.c. magnetron sputtering, 6
X-ray study of generalized Cantor superlattices, 120
Structural properties
nanodispersed Cr_xSi_{1-x} thin films: transport properties and thermoelectric application, 24
structural, optical and electrical properties of polycrystalline iron pyrite layers deposited by reactive d.c. magnetron sputtering, 6
Superlattices
X-ray study of generalized Cantor superlattices, 120
development of Ni/Ti multilayer supermirrors for neutron optics, 110
Surface morphology
aluminium content dependence of milky transparent conducting ZnO:Al films with textured surface prepared by d.c. magnetron sputtering, 86

Tin oxide
modified high resolution electron energy loss spectra applied to analyse nanometre features in AlSn sputter films, 53

Titanium
development of Ni/Ti multilayer supermirrors for neutron optics, 110
preparation of Si–$TiSi_2$ Schottky diodes by rapid thermal annealing, 172
Titanium oxide
photoelectric properties of colloidal semiconductor films, 13
Transmission electron microscopy
Al–Si–V and Al–Si–V–Pd films as alternatives for Al–Si–Cu in interconnect: microstructure and its impact on reliability, 164
shock fracture replicas for thin film microstructure investigation in a transmission electron microscope, 42
X-ray diffraction
X-ray study of generalized Cantor superlattices, 120
X-ray photoelectron spectroscopy
deposition of thin indium oxide film and its application to selective epitaxy for *in situ* processing, 58

Zinc oxide
aluminium content dependence of milky transparent conducting ZnO:Al films with textured surface prepared by d.c. magnetron sputtering, 86
magnetic and structural properties of Pt/Co and Pd/Co multilayers sputtered on single-crystal ZnO, 126
transparent conducting ZnO thin films prepared on low temperature substrates by chemical vapor deposition using $Zn(C_5H_7O_2)_2$, 65
